25X1

The attached appendix is a tabulation of information obtained from the examination of 35mm film delivered to the Photographic Intelligence Division by SR/4/DD/P. The film exposed by an automatic camera in operation at a selected point near the USSR-Iran border obtained coverage of railroad traffic on the line between Krasnovodsk and Tashkent during daylight hours between 14 November and 28 December 1956.

The general quality of the film is poor. For this reason a day by day breakdown of railroad traffic could not be determined with reasonable certainty.

The following symbols are used in the accompanying appendix:

4	-	4-wheel truck railroad car
2	-	2-wheel truck railroad car
b	-	boxcar
t	-	tank car
p	-	passenger car
g	-	gondola
hg	-	high side gondola
f	-	flat car
bb	-	bitumen bunker
h	-	hopper car
r	-	refrigerator(often indistinguishable from boxcar)

249 trains - 5.5 trains per day - daylight hours only!
45 days
